

Capstone Team Canvas – to guide an initial dialogue...

<u>Vision</u> – what impact do we want this project to have on our client? Yourself?  • competent integration of multiple systems • better understanding of coffee/espresso brewing	<u>Goals</u> – what do we want to achieve as a group? What measurable goals do we share?  • make a better, repeatable coffee • make a competent particle analysis measurement tool	<u>Values</u> – what personal values do you bring to the team? How do these values support the project?  • build for incredible accuracy • have a personal dedication to making the machinery work well
<u>Assets</u> – what skills do we have on the team? What are we good at individually? How does this make us a strong team?  • conjunction with ME teams • covers a wide variety of programming systems • some specific coffee lovers (espresso understanders)	<u>Development</u> – what weaknesses do we have as a team? As individuals? What are obstacles we are likely to face?  • whole team is large, disjointed • makes scheduling and communication arduous • ME team has own capstone class and different goals	<u>People</u> – what do we envision our roles might be in the project?  • ethan - coding, hardware, project lead / voice • hussein - coding and outlining/documentation • clarke - coding and ME design instantiation • david - Hardware and physical/firmware • roman - Hardware and physical/firmware
